

CATEYE V2c/V3 CC-TR200DW/300TW Quick Start

Click the button and follow the instructions.

Thank you for purchasing our cyclocomputer CATEYE V2c/V3.

This Quick Start Manual explains how to set up the computer, how to install the unit to your bicycle, and how to wear the heart rate sensor.

Please set up the unit according to the specified procedure, then it will be ready for use as a cyclocomputer.

- **Before use, read the instruction manual that comes with the product thoroughly to the end to understand the functions of this unit, and to use it safely in a correct manner.**
- **Pacemaker users must not use the heart rate sensor provided with V3 (TR300TW).**

This PDF contains a movie file.

When you click on the movie screen, a message regarding security appears. Click the “**Trust in the text**” or “**Play**” button to close the message.

Click the screen again to play the movie.

Operation of buttons

Set up the computer by operating the buttons as follows.
Check the button position before you start setting up.

Front

Press the **SSE** button, the **M1/+** button, and the **M2/-** button on the front of the computer.

Back

Press the **MENU** button on the back of the computer.

Measure the tire circumference (L) of your bicycle

Adjust the tire pressure properly. With the rider's weight applied on the bicycle, roll the wheel one tire revolution with reference to a marker such as the valve, and measure the travel distance on the ground.
